The tram inquiry team.

Dear Sirs

2nd April 2016

I wish to be a member of the public who gives evidence at the Inquiry.

I have been involved since the bill was pushed through by Wendy Alexander in the Scottish Parliament.

I have made my views known by radio on Radio Forth and by articles in the press, I have been at the initial public meetings where the audience have shown their wishes against the project to no avail.

I suspect that the tendering process was flawed but would like to be made aware of how the procedure was carried out. Professor Harvie wrote an article on 13th November in the Evening News to the effect that the Tübingen Stadtbahn line is being effected at a quarter of the projected Edinburgh extension price per Km.

I am greatly alarmed that an extension would put our heavily indebted council over the top.

I should appreciate you putting me on your list of people willing to provide evidence to the Inquiry.

Yours sincerely
