

Edinburgh Tram Inquiry Glossary

Purpose

1. The subject matter of the Inquiry involves a large number of acronyms (ie TIE), instances of specialist terminology (ie pre-qualification) and the use of fact specific references (ie Project Carlisle).
2. This obviously presents a challenge to the Inquiry team and to the Core Participants both in understanding what is going on and ensuring a minimum of consistency in the use of acronyms or certain words. The glossary provides some assistance to all in understanding core terms.
3. Parties should bear in mind that some acronyms or terms may be used by different parties to refer to different things (ie FM is used to mean both First Minister and Functional Manager). Where this occurs, the exact meaning will depend on the context and users of this glossary should take steps to clarify the meaning intended in that context.
4. This glossary:
 - a. Can be searched by hitting the Ctrl and F keys and then entering the desired term; and
 - b. Contains a number of internal links between related entries which can be clicked upon.
